

New life for your existing Lenovo devices running VXL Linux and LeTOS

Trade Up Program FAQ

How does the Trade-Up program work?

- Complete the Trade-up form on our website.
- Consult with one of our specialists to explore your Trade-up opportunity.
- Experience NoTouch OS on your own hardware.
- Collaborate with the Stratodesk team to re-image your Lenovo device with NoTouch OS.

Does Stratodesk have a Device Management Console similar to LDM (Lenovo Device Manager)?

Stratodesk's NoTouch Center is a versatile, web-based device management console that can be installed either on-premises or in the cloud. It offers full scalability and a comprehensive suite of enterprise-grade features and settings.

What Lenovo thin clients and devices are NoTouch OS compatible with?

Eligible products can be found on the list of Lenovo legacy and new devices, sold with LeTOS/VXL Linux devices. Please note, that the list might not include all devices eligible for an upgrade. If your specific device isn't mentioned and you're considering an upgrade, please reach out to us to determine compatibility.

New Devices

- Lenovo ThinkPad
- Lenovo ThinkCentre
- Lenovo M75q Thin Clients

Legacy Devices

- S0MS00
- S03J00
- M625q
